

BURGERFI

TENANT FINISH | WICHITA, KS

BurgerFi is among the nation's fastest-growing, gourmet burger chains. Ink construction was proud to be chosen as the contractor of the first Wichita location. BurgerFi is an eco-friendly gourmet burger restaurant. Environmental sustainability guides every decision BurgerFi makes. Everything from the food to store construction material points to one vision. BurgerFi is natural and proud of it!

BurgerFi walks the talk. They use only 100% natural Angus beef patties with no steroids, antibiotics, growth hormones, chemicals or additives. Their restaurants feature an inviting and eco-friendly atmosphere with upcycled (made from something else) furnishings, LED lighting, a 10' ceiling fan that uses 66% less energy, and renewable timber sourced wood panels. The self-serve ordering stations add convenience and speed to your order.

Ink Construction is experienced in working with sustainable materials and running a project to reduce overall waste. The project also included adding Audio/Video, the installing, and testing of kitchen equipment, and running beer tap lines.

▲ A major part of BurgerFi's brand is eco friendly materials. The red chair is 111 upcycled aluminium soda bottles and the table is made from recycled pallets.

Brand:	Burger Fi
Location:	Wichita, KS
